Re: Conflict Minerals Act Compliance

Dear valued customer,

The Dodd-Frank Act, Section 1502 (Conflict Minerals Act) concerning Conflict Minerals requires disclosure of the mining source of the following materials: Gold, Tin, Tantalum and Tungsten.

Mid-West Spring & Stamping is not an issuer whose shares are publicly traded in the United States and, therefore, is not directly subject to the Conflict Minerals Act.

Mid-West Spring & Stamping is not a manufacturer of spring steels or other materials used to manufacture mechanical springs. Mid-West Spring & Stamping manufactures springs using material purchased from various spring steel suppliers. Tin (Sn) is used to manufacture bronze and bronze alloys used in the spring making industry. Mid-West Spring & Stamping has contacted all current vendors who are suppliers of bronze alloy material used for making springs and stampings at our facilities. Each vendor has submitted a disclosure statement showing that no materials are purchased from regions known to be "Conflict Regions". Therefore, to the best of our knowledge, all of the materials purchased by Mid-West Spring & Stamping that are used to manufacture our products have DRC-Conflict Free status.

Sincerely,

Mid-West Spring & Stamping Co.

C. J. Overmyer, President

**We look forward to supplying you with the world's finest
Springs, Stampings and Wire Forms.**
